Subject: Can't you find another place to dump it?

Federal Record Status Not Determined

- att1.htm

I am writing to express my deep concern over the Yucca Mountain Project and the flawed process railroading it toward approval.

Give the Shoshone Nation a break, and don't destroy another native american holy site. The fact that there's drinking water under the mountain should make it %100 clear that this is not a place to dump radioactive waste. How would you like that if someone did that in your backyard. Just because your white doesn't mean you should get clean water and land and have stuff dumped on colored peoples.

How can the Secretary of Energy be preparing to recommend Yucca Mountain for a high-level nuclear waste dump when thousands of public comments on the Draft Environmental Impact Statement still have not been addressed? Without a Final Environmental Impact Statement, a detailed transportation scenario, finalized Siting Guidelines, or a licensing rule, the Department of Energy lacks the basis for consideration of site suitability. The public cannot have confidence in any recommendation that arises from such a dramatically flawed process. I urge you to abandon the Yucca Mountain Project.

Sincerely,

Voter,
Elisabeth Laudon
